

BOE330

SAP BusinessObjects Business Intelligence Platform: Designing and Deploying a Solution

Course version: BOE330

Duration: 5 days

Cost: Virtual: \$3,750.00

Delivery Type: Instructor-Led Virtual Classroom

Prerequisites:

Essential

- BOE310
- BOE320

Recommended

- None

Audience:

- Solution Architect
- System Administrator
- System Architect

Goals:

Students will learn knowledge required to design and deploy an SAP BusinessObjects Business Intelligence platform.

Students will learn how to analyze and identify customer requirements in order to design a solution using the concepts of High Availability, Scalability, Sizing, Disaster Recovery, and Lifecycle Management.

Students will use a case study to design, build, and troubleshoot a system.

Students will produce a content management plan using advanced security and replication techniques.

Content:

- | | |
|---|--|
| Business Intelligence (BI) Platform Architecture | Authentication, Authorization, and Security |
| Describing the BI Platform Architecture, System & System Elements | Describing the BI Platform Security Architecture |
| Identifying Key Architecture Flows | Setting Up User Rights in the BI Platform |
| Describing the Application of the BI Platform | Content Management Planning |
| Identifying the Best Practices for Planning a Deployment | Preparing to Manage Content |
| Creating Collaborative Experiences with BI Data | Upgrading a Deployment |
| Process for Deploying a BI Platform | Managing the Life Cycle of a Deployment |
| Describing the Deployment Process | Moving Objects from One Deployment to Another |
| Deployment Design and Sizing | Deployment Administration |
| Designing an SAP Business Intelligence Deployment | Auditing and Monitoring a BI Platform Deployment |
| Designing a Scalable System | Performing Advanced Troubleshooting of a BI |
| Preparing a Sizing of a BI Platform Deployment | Platform Deployment |
| Landscape Planning | Deployment Replication |
| Planning a Deployment Solution | Replicating a BI Platform Deployment |
| Planning the Configuration of Each Tier | |
| Selecting Deployment Templates and Options | |
| Designing an Architecture Plan | |
| Deployment Installation and Configuration | |
| Preparing the System for Deployment | |
| Deploying Central Management Service (CMS) | |
| Organizing BI Platform Servers | |
